

Software Innovation and Machine Intelligence Applications group

CIT's SIGMA research group (<http://sigma.cit.ie/>) has an extensive track record applying advanced software and computational techniques to real world problems. We have enabled commercial applications in medical informatics and software solutions for life science.

We have funded PhD scholarships for suitable qualified candidates in the following areas:

- Machine Learning
- Cloud Computing
- Health Informatics
- Bioinformatics

Interested applicants should have an honours degree in science in a numerate or a related discipline. Candidates need to provide the required information:

- C.V., including:
 - List of internships or projects (subject, name supervisor, grade, etc)
 - TOEFL scores (www.ets.org) (if available)
 - Degree Grades

The CIT (www.cit.ie) boasts many top class facilities including its award-winning Library & IT Building and its world class laboratories. CIT presently has four separate campuses. The main campus is located in Bishopstown and covers an area of approximately 80 acres.

The scholarships include fees and monthly stipend of €2,000, (€24,000 Per Annum), which includes fees, travel and equipment expenses.
